VERY MOISTURIZING

I didn't know how effective the gel cream would be since I was skeptical of the texture, but my sensitive skin loved it and I didn't even break out when I first started using it. Love it!

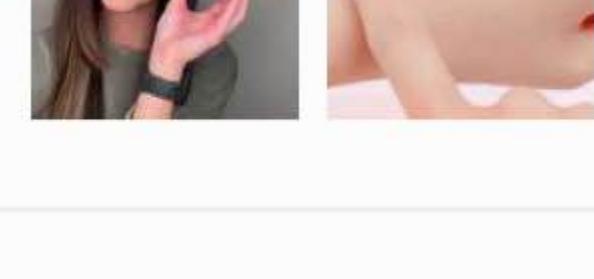

Aileen R.

★★★★★

12/02/23

REALY LIGHT AND NOT STICKY.

Really light and not sticky. My skin soaked it right up! I mix it with the green tea products and it helps balance my combo skin.

Cathy K. Verified Reviewer

★★★★★

WHAT MAKES IT GOOD

WHAT MAKES IT GOOD

Unique water-activated powder exfoliant infused with Rice Powder, Rice Extract, and Papaya Extract. This low PH formula is free of artificial fragrances and colors.

Key Ingredients

- Rice Powder - Fine powder gently exfoliates the skin.
- Rice Extract - Anti-inflammatory soothes and hydrates skin.
- Papaya Enzyme - Removes dead skin, improves skin tone and texture for softer and brighter skin.

Floral Essence Masks Sets

★★★★★ 4 reviews

\$9.00

Bring on bright glowy skin with our I'm Rice Exfoliating Enzyme Cleanser! This water-activated powder exfoliant is infused with Rice Powder, Rice Extract, and Papaya Enzyme to gently exfoliate skin and reveal a brighter and more radiant complexion! Vegan, free of artificial fragrances, colors, and low PH.

Size: 10 g

RECOMMENDED FOR

 All Skin Types Combo to Dry Dryness[Add To Cart](#)

WHAT MAKES IT GOOD

Unique water-activated powder exfoliant infused with Rice Powder, Rice Extract, and Papaya Extract. This low PH formula is free of artificial fragrances and colors.

Key Ingredients

- Rice Powder - Fine powder gently exfoliates the skin.
- Rice Extract - Anti-inflammatory soothes and hydrates skin.
- Papaya Enzyme - Removes dead skin, improves skin tone and texture for softer and brighter skin.

Cracking the Coconut Code

Few ingredients have been debated as much in recent years as coconut oil. Is it or is it not the "miracle product" so many claim it to be? We answer: Like anything, it depends. One of our newest brands, Solved Skincare, puts coconut oil front and center, so we wanted to give you the facts to decide how your specific skin type can reap its rewards.

Keep reading below as we take a deep dive into the 'nut.'

Bloom Beauty Best of 2023

Can you believe we're here? Another year is wrapping up and we're feeling celebratory, wanting to share our list for the best products of 2023. There are so many ways to categorize what is already a collection of our favorite brands, but ultimately we decided that by focusing on HOW CLEAN THE INGREDIENTS ARE, and HOW EFFECTIVE THE FORMULAS, you'll be able to find something streamlined for glowing skin success.

7 Skincare Habits to Break Now

Great skincare is a long game—it doesn't happen overnight, but little steps are made (nightly!) to get and keep your skin at its most radiant state. Today, we are uncovering some of our top small but powerful habits that can make a world of difference with your skin.

You do not need to focus on all seven immediately, so take heart. Use this as a checklist. If your skincare has stalled, then it might be time to stop these.

Tips # EcoFriendly # SkinHealth

Getting Your Skin Care Back on Track

With so many novel and ever-changing concerns occupying precious brain space lately, you're forgiven if maintaining a multi-step skincare routine hasn't been at the top of your list. Add to that list stress, poor sleep and higher sugar or junk food intake, and right now your skin is probably in need of a little (or a major) reset.

You've come to the right place! To get back into a rhythm with your skincare routine, we're sharing our favorite "start here" tips below.

HOW IS COCONUT OIL MANUFACTURED?

Coconut oil is extracted from the meat of the cocos nucifera, a specialized type of palm tree. Like all plant-derived products, there are quicker (and cheaper) and longer (with higher quality) ways of doing this. Unlike olive oil, the terms "virgin" and "extra virgin" aren't regulated with coconut oil, so they tend to be used interchangeably.

The oil itself is extracted either by pressing fresh coconut meat or refining a dried version called copra. Expeller-pressed "virgin/extra virgin" coconut oil uses heat or steam to release the oil, while cold-pressed coconut oil (like the kind in Solved's [Cleansing Balm](#)) keeps the temperature below 120F, preserving more nutrients.

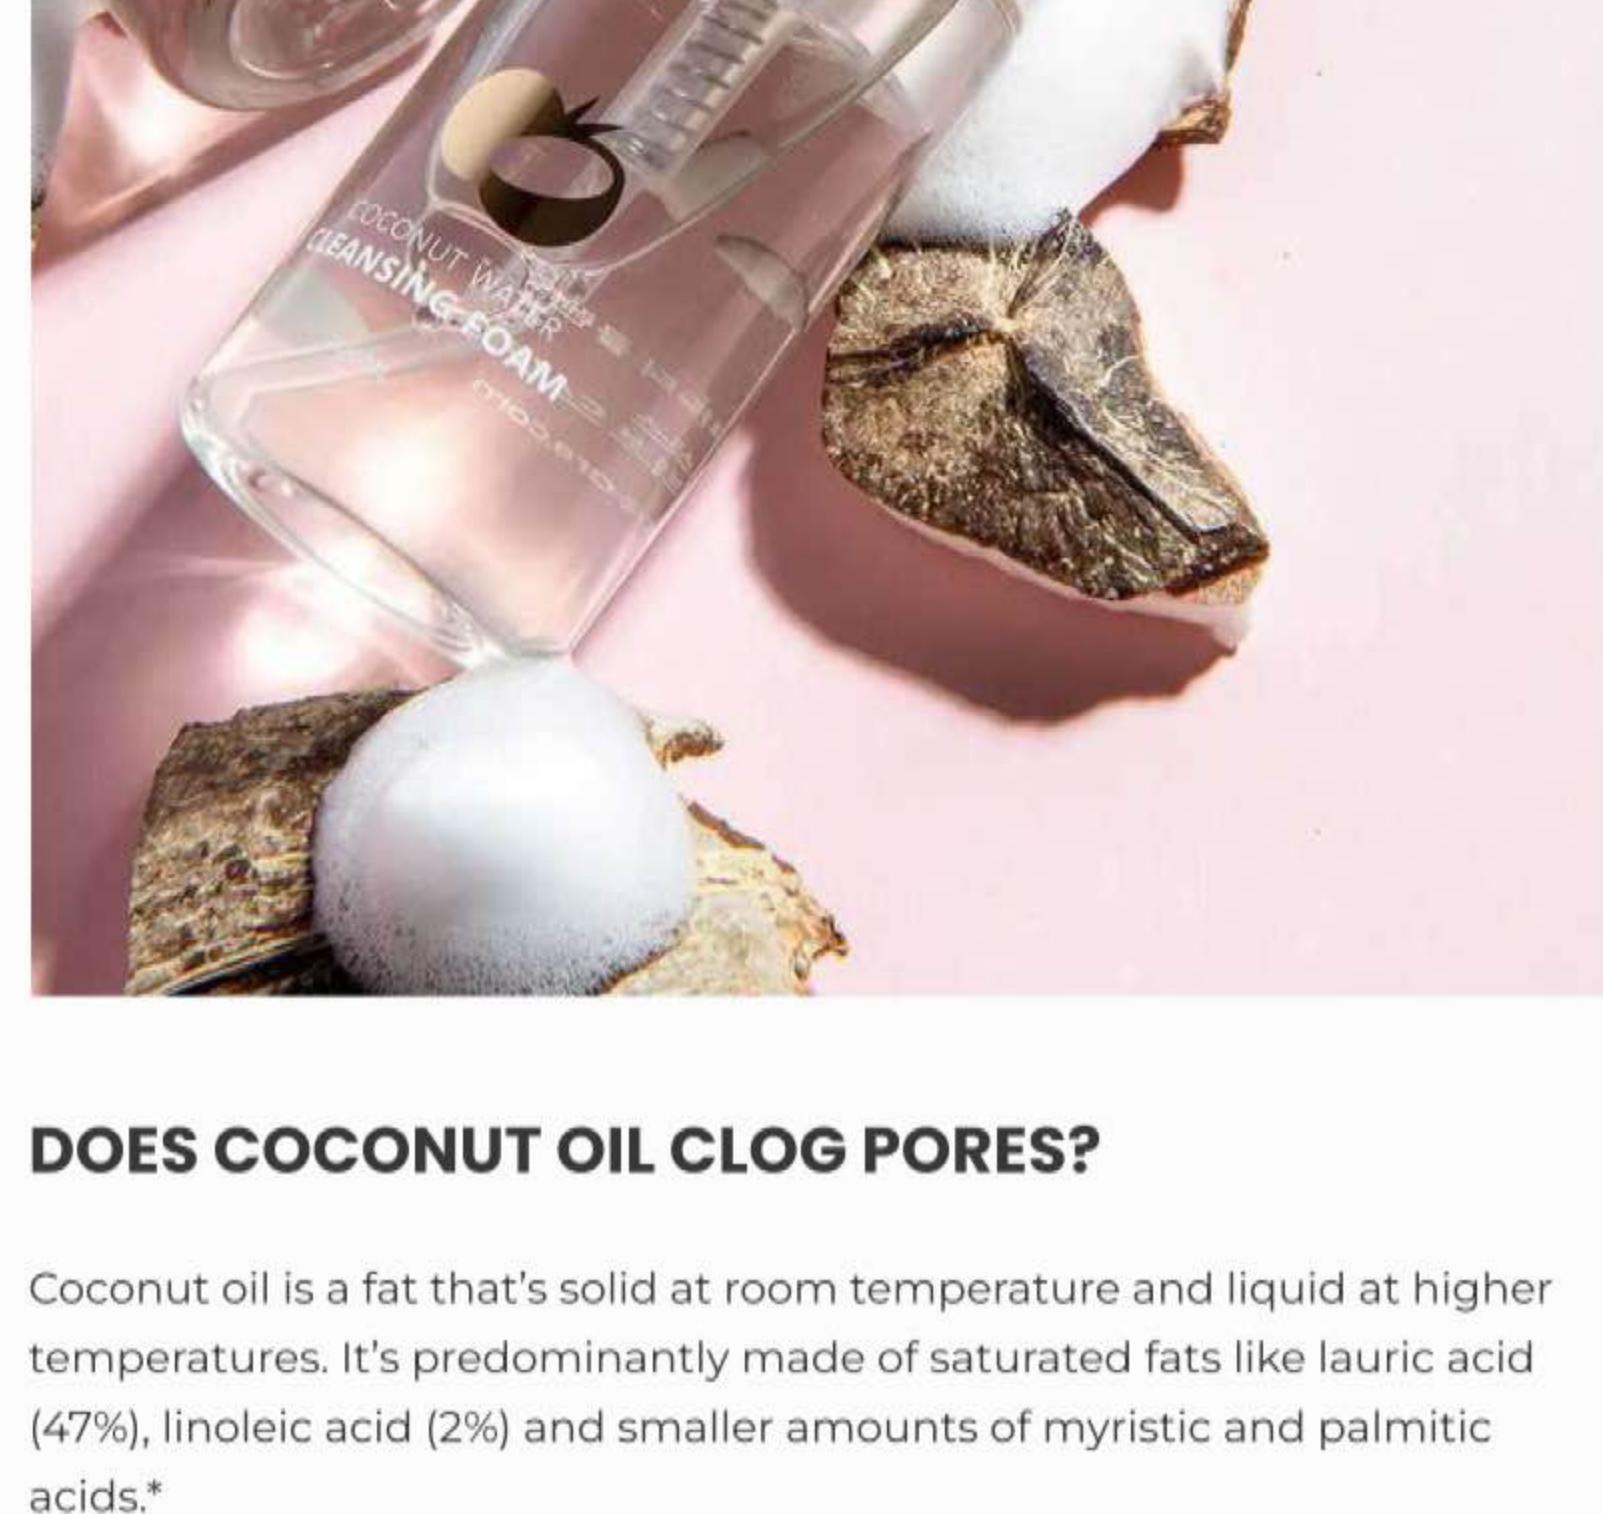

Refined coconut oil machine-presses the copra to release the oil, then "bleaches" it through clay filters to remove any bacteria or impurities.

DOES COCONUT OIL HELP WITH ACNE?

Given the above, the fact that coconut oil is often included in products for oily or acne-prone skin might seem counter-intuitive. However, its acne-fighting abilities aren't so much in its moisture (unless you count its ability to fade acne scars) as they are in the antimicrobial properties of lauric acid, the medium-chain fatty acid found in highest concentration in coconut oil. Research has shown that lauric acid may help kill harmful pathogens in the body, and it's also been shown to destroy P. acnes -- a bacteria that causes acne -- all on its own. One study additionally showed lauric acid to be more effective than benzoyl peroxide against acne, and coconut oil can also help with redness and inflammation, a regular side effect of breakouts.

This isn't to say coconut oil should be avoided, rather that its high moisturizing capabilities work best as a first cleanser and even better when paired with something exfoliating...

DOES COCONUT OIL CLOG PORES?

Coconut oil is a fat that's solid at room temperature and liquid at higher temperatures. It's predominantly made of saturated fats like lauric acid (47%), linoleic acid (2%) and smaller amounts of myristic and palmitic acids.* Because it's fat, coconut oil makes a great emollient, dissolving oils, sealing moisture inside the skin, and keeping dirt and irritants out. Sitting on the skin's surface, coconut oil helps repair cracks -- making it great for drier skin -- and contributes antioxidants and anti-inflammatory properties that can help with wound healing. However, it's this same emollient ability that may trap dirt and irritants inside pores too, making it comedogenic. This isn't to say coconut oil should be avoided, rather that its high moisturizing capabilities work best as a first cleanser and even better when paired with something exfoliating, to be sure nothing that shouldn't be on your skin gets left behind.

SO, WHAT SHOULD I USE?

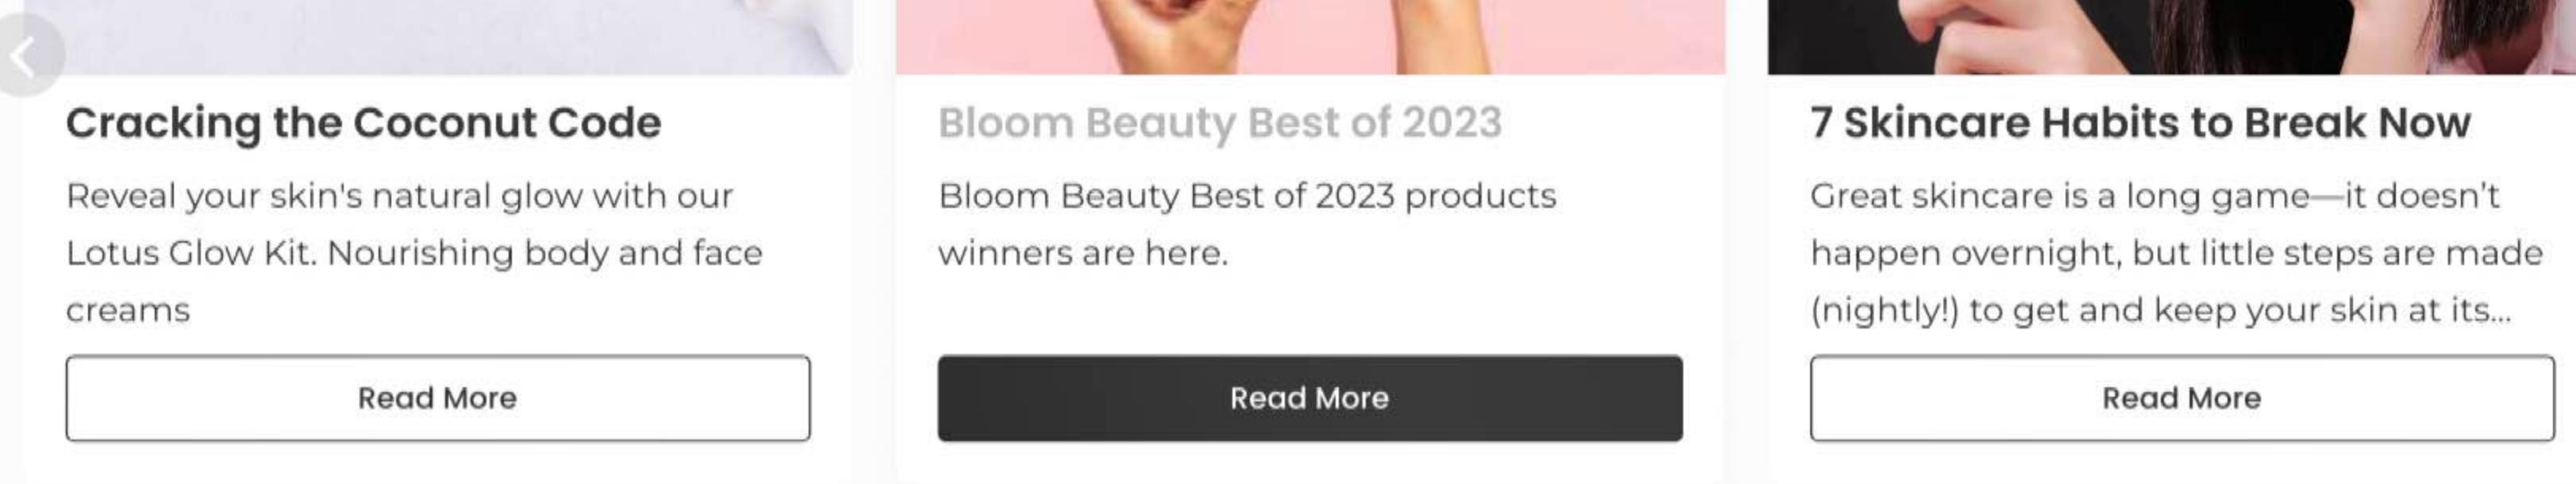

Again, it's important to consider your specific skin type and the goals that you have. If you deal with very dry, damaged or inflamed skin, coconut oil's moisturizing and nourishing properties could provide some immediate soothing relief and prevent vital moisture from evaporation. If dealing with breakouts or an oilier complexion, try washing with coconut water to start, working up to the oil once your skin has balanced and cleared up a bit.

WHAT MAKES IT GOOD

Unique water-activated powder exfoliant infused with Rice Powder, Rice Extract, and Papaya Extract. This low PH formula is free of artificial fragrances and colors.

Key Ingredients

- Rice Powder - Fine powder gently exfoliates the skin.
- Rice Extract - Anti-inflammatory soothes and hydrates skin.
- Papaya Enzyme - Removes dead skin, improves skin tone and texture for softer and brighter skin.
